Quality Policy Statement

Thurston Machine Company Limited is committed to remaining a leading manufacturer in the steel mill, mining, off-road trucks, power generation and transportation industries. Our capabilities include machining, fabricating, painting, assembly and testing, and specialize in the manufacturing of “build to print” equipment.

Thurston Machine Company Limited seeks to continuously improve its effectiveness through the implementation and maintenance of a quality system. The improvement is measured against objectives that are defined at all levels of the organization.

Thurston Machine Company Limited is committed to meeting or exceeding our customer’s expectations by offering competitive pricing and a full range of services in house.

We aim to be our customer’s first choice by providing greater than 98% customer satisfaction on delivery and less than 1% of revenue costs in quality rejects at the customer level through our commitment to improve the effectiveness of the quality management system and the implementation and maintenance of a QMS.
